UX Skills

User Empathy

I focus on the wants, needs, and existing abilities of the user to develop and customize an optimal experience.

Wireframing

I design paper prototypes, low fidelity and high fidelity wire frames in order to ensure my design meets user criteria, visually pleasing, and easily navigational.

Visual Design

I conference with the client and or user about their requests and present a few mock ups and ways to successfully show how to execute their ideas for the final product.

Tools I know

Figma

InVision

Codepen

Canva

Adobe XD

WordPress

Adobe Color

About me

I am a UX/UI designer based in the DMV area with a background in Museum Studies (Visitor Experience and Exhibition development). I specialize in wire-framing, user empathy mapping, and visual design.

I enjoy designing digital experiences that help users easily navigate and meaningfully engage with content.

My background provides me with the unique ability to empathize with users and proficiently address user needs.

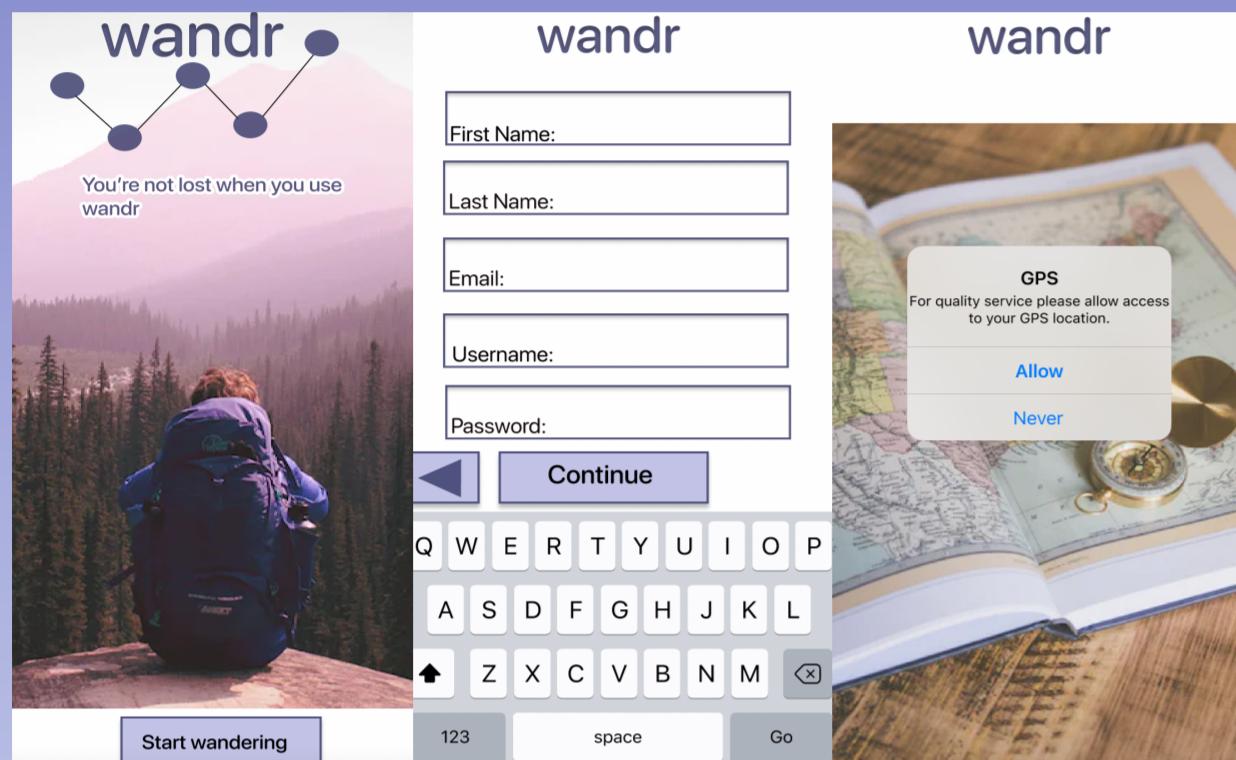

Education and Certifications:

MA Museum Studies, George Washington University

UX/UI Design Professional Certificate, George Washington University

My work

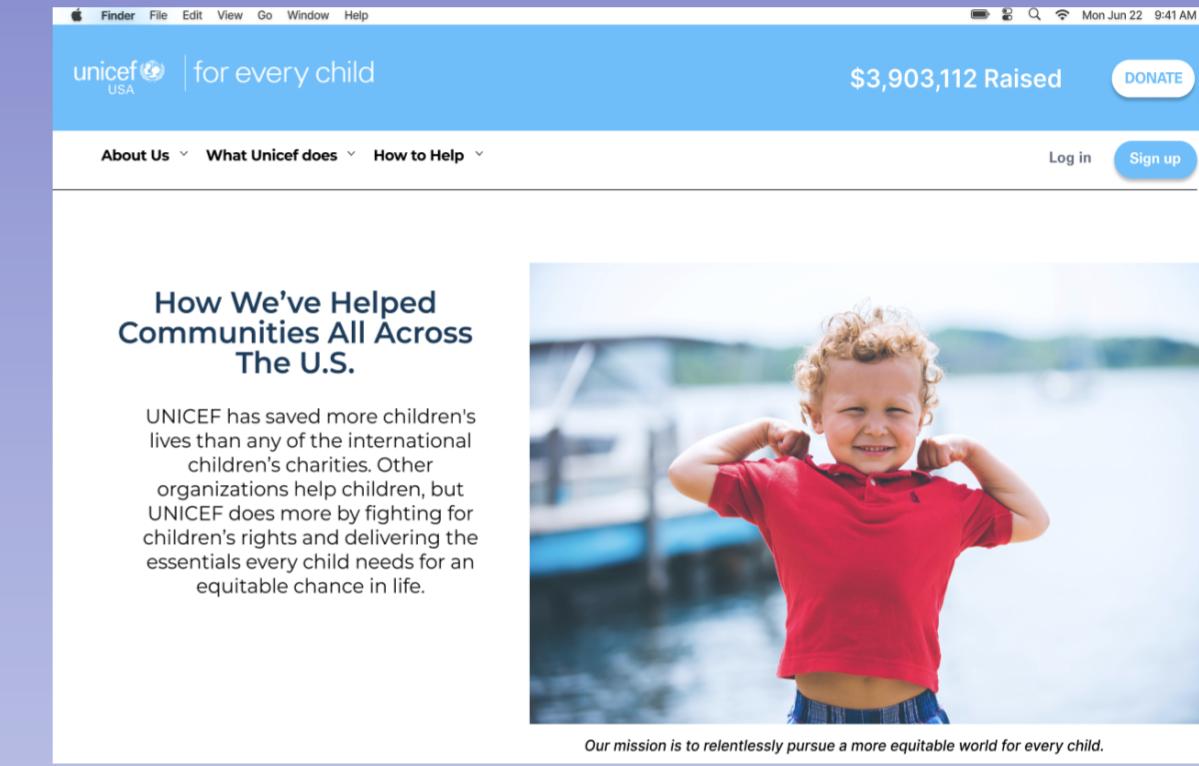

Mobile Prototype: Travel App

Developed travel application that keeps track of finances for group and single travel. The app can be used prior to the trip for planning and during to actively track purchases and contributions if traveling in a group.

Website Redesign: Department of Homeland Security.

Choose a government website to redesign using the skills you have learned thus far and make edits to the site that you think would optimize user experience and increase usability.

Website Redesign: UNICEF USA

Select a humanities website to redesign and in a group of 3-4 develop a high fidelity website prototype and mobile application. UNICEF USA was selected and redeveloped to emphasize how UNICEF's donations positively impact the lives of its recipients.

Contact

I'd like to share my work with you and answer any questions that you may have.

Department of Homeland Security Website Redesign homepage

The screenshot shows a modern website design for the Department of Homeland Security (DHS). At the top left is the DHS logo and the text "Homeland Security". A search bar is at the top right. Below the header, a large banner features a stylized American flag with silhouettes of people holding hands against a brick wall. To the left of the banner is a call-to-action section with the text "Migration and Borders: Expanding Lawful Pathways + Enhanced Enforcement." and a "Learn More" button. Below this is a navigation bar with links: "About DHS", "Get Involved", "How do I?", "In focus", and "Topics". The main content area contains three cards: one for "Asian Pacific American Heritage Month" (with a red, orange, and teal brushstroke background), one for "Uniting Ukraine" (with a blue and yellow background showing hands), and one for "Allies Welcome" (with a photo of refugees). Navigation arrows are present on either side of the cards.

Migration and Borders:
Expanding Lawful
Pathways + Enhanced
Enforcement.
